MI 00 620

Il Materiale MI 00 620 è rigido con un elevato coefficiente di attrito. Le caratteristiche maggiori sono la durezza, la forza meccanica e la resistenza ad altissime temperature. E' composto principalmente da resina e gomma legati insieme con agenti modificanti. Le fibre minerali aumentano la forza che aiuta a stabilire il valore di attrito.

MI 00 603 is developed for static applications, it is rigid and moulded friction material. Its most noted characteristics are hardness, mechanical strength and resistance to temperature. Its efficiency is very high. It is composed basically of resins and rubber as a link system with friction modifying agents. The mineral fibres enhance the strength which helps to establish the friction value.
